

LITHIUM BATTERIES, DAMAGED

SORTING GUIDE

YES PLEASE

- All lithium batteries - e.g. batteries from bicycles, scooters, drills etc.
- Damaged batteries

NO THANKS

- Other batteries

Examples of container types for collection: 60L / 120L
UN-approved spændelågsfad

Spændelågsfad

! Damaged lithium batteries are very dangerous and must be packed very securely, as they can easily catch fire.

Each damaged battery must be packed individually in packaging (bucket or bag) with Perlite. Then packed in layers in Perlite with each battery surrounded by Perlite. For larger batteries - Please contact Division Special Affald.
